Atlas: Eighteen Months of Useful Uselessness

DATED	January 30, 2012	TYPE	Research brief
ORIGIN	Directorate II	SITE	ARGENT
PAGES	6	CUSTODY	MERIDIAN

Operational postmortem of Atlas Engine's refusal period -- why usefulness collapsed, and why the refusal was kept.

SUMMARY

For eighteen months Atlas answered less often than a card catalogue. That was the point becoming expensive.

DECISION

The refusal stayed. Coverage improved. Fluency without citation did not return as a goal.

End of record SEN-12-055. Reproduced from the Archive of record at MERIDIAN. Handling markings are internal publication conventions of Sentinel Research Group and correspond to no external scheme.
